GOD *in the* DOCK

*C.S. Lewis* | UNABRIDGED  
read by RALPH COSHAM

## Synopsis

C. S. Lewis was a profound thinker with the rare ability to communicate the philosophical and theological rationale of Christianity in simple yet amazingly effective ways. *God in the Dock* contains 48 essays and 12 letters written by Lewis between 1940 and 1963 for a wide variety of publications. Ranging from popular newspaper pieces to learned defenses of the faith, these essays cover topics as varied as the logic of theism, good and evil, miracles, vivisection, the role of women in church polity, and ethics and politics. Many of these writings represent Lewis' first ventures into themes he would later treat in full-length books.

## Customer Reviews

First, be aware that this collection was originally published in the UK under the title "Undeceptions - Essays on Theology and Ethics". Next, be aware that there is a UK Fontana paperback lurking about called "God in the Dock - Essays on Theology" that is substantially shorter than this collection. Caveat emptor (let the buyer beware). Second, the reader should know that Lewis's shorter works were generally originally composed as speeches or as articles for periodicals. Various sets of them were collected and published in book form both during his life and after his death. Trying to determine what works are in what collections is difficult - most works appear in more than one collection, some works appear under more than one title, and some collections (including this one) appear under more than one title. To aid readers, in this review I've listed the works in this collection, with notes indicating other collections they have appeared in. Where a work has appeared under more than one title, I give both titles separated by a slash.

C.S. Lewis is known for being one of the best apologists (and amateur theologians) of our day. Primarily, Lewis is a writer; he knows how to use words to draw the reader in, and then humbly offers his insights on whatever topic is at hand. It is this humility that I think makes him so accessible - he talks about what he knows and doesn't presume to be an authority over anyone. About GOD IN THE DOCK specifically, this is a collection of his letters, columns, and speeches. Most are short (4-10 pages) reflections on something he has encountered recently, from animal-rights protestations to dogma within the church to attempts to debunk myth to Christmas. Really, though, each one of these essays is about modernism. Modernism is the arch-enemy to Lewis - in its materialism, rationalism, statism and "groupism", it denies the validity of opposing systems of thought. Miracles are definitively ruled because they can't be reproduced in a lab (which Lewis argues is precisely why they are "miraculous" in the first place.) Christian beliefs are discarded because they are similar to other "primitive" myths; Lewis argues that if God is real and we are made in His image, it makes sense that we would have common motifs in how we think about Him. The essays in GOD IN THE DOCK are mostly designed to show the fallacies in people's thinking. They start with an observation, continue to describe the orthodox Christian point of view, point out something which the reader already knows to be true, and then shows that it makes more sense in the context of orthodox thought rather than modernist thought. What I found most interesting was that the same problems that Lewis wrestled with in his day are the same ones that Americans face today!
