Infantry Weapons Of World War II, USA, UK, Germany, USSR, Japan, More

Synopsis

This fantastic all-color reference provides engaging insights into the main infantry weapons of the five largest protagonists of World War II - Germany, Japan, Russia, the United States, and Great Britain, with particular attention paid to the actual roles these weapons played in battlefield combat encounters. Comparing axis to allies - who had the upper hand, the fair (or unfair) advantage - author Jan Suermondt examines the physical details (and provides current collector values) of over 150 small arms, including revolvers, pistols, rifles, submachine guns, machine guns, mortars, grenades, and mines. You'll be introduced to the types of weapons used during the war; how five years of war saw the needs and types of weapons change; as well as the technological advances during the period (paying particular attention to antitank weapons). More than 500 photographs, including actual war images, present a masterful visual iconography of some of the most important weapons carried into combat - the U.S. Army's BAR, the British Bren, the German Schmeisser, and the Russian Degtyarev DP/DPM.

Book Information

Paperback: 256 pages

Publisher: kp books; First Edition edition (August 2004)

Language: English

ISBN-10: 0873497856

ISBN-13: 978-0873497855

Product Dimensions: 8.9 x 11.9 x 0.6 inches

Shipping Weight: 2.4 pounds

Average Customer Review: 2.8 out of 5 stars [See all reviews](#) (4 customer reviews)

Customer Reviews

Ok, I purchased this book because from what it looked like, it was gonna be good. Wow, was I wrong! First off, I decided to just thumb through it and check out some of the photos. Well, there are mislabeled photos throughout the book. They have a PPSh ejector port on the Thompson page. They have a Colt on the Webley page. Kinda irked me but I decided to start reading it. Several mistakes on the weapons. And the so-called "current collector values" is a JOKE. If the guns were

actually worth as much as the author has them listed, I'd have a majority of them. But I don't cause almost ALL OF THEM ARE UNDER PRICED. He also has a 1918 Browning Automatic Rifle listed under rifles, but in all actuality, it's a machine gun. I collect World War 2 weapons and this book is the biggest disappointment of all the books that I have on the subject. I highly DO NOT RECOMMEND. Find something else rather than waste your money on this.

Good pictures, but very disorganized. Seems like they hurried to get it published. Several guns were in the wrong category, wording was sketchy at best. Doesn't look like anybody proofed it before it went to publication.

Hard for me to dislike any book that reflects the tools and images for the Great Wars. However I have to say that this book simply tries to woo the reader with its color pictures. Certainly not its detail or length of information. John Walter has a book Military Rifles of Two World Wars which is far superior to this one in details even if limited to rifles only. Granted, Sudermond does include machine guns, mortars, and anti-tank weapons, I guess I just got sore at the way he categorized some weapons like Mausers.

Excellent book
