Teaching In Nursing: A Guide For Faculty, 4th Edition

Synopsis

Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education -- teaching, curriculum, and evaluation. Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been updated with information on the latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, Teaching in Nursing is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students -- the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future. Updated Clinical Simulations chapter describes the most up-to-date simulation products and includes new information on using simulations to facilitate learning. NEW! Expanded information on using technology to facilitate learning. An emphasis on curriculum includes information on the newest competency-based and concept-focused curricula. NEW Developing Learner-Centered Courses chapter presents new information on learner development and socialization. NEW Accreditation of Nursing Programs chapter provides an overview of how a program attains accreditation status, and explains the importance of having an accredited nursing program. A completely revised media chapter provides new information about classroom response systems, using digital media, and handheld devices in the classroom. The evaluation section has been expanded to be inclusive of program evaluation related to accreditation process. Expanded information on developing and using classroom tests includes specifics on writing effective multiple-choice questions and the importance of item discrimination. The latest distance learning information describes the positives and negatives of video conferencing,

webinars, and the latest approaches to engaging learners at a distance. Coverage of online teaching includes examples of how to design a course using Web 2.0 tools.

Customer Reviews

This book was required reading for graduate nursing program, but it is one that I will keep for reference. The text is also recommended by highly respected nursing certification exam review. It is an easy read, inspiring and practical.

I had to have this for a graduate textbook for a class at UTA. The book is pretty easy to read for a textbook. I think that it will help me in my career. I am about to graduate and many prospective employers are interested in hiring me as a nurse educator, so I plan to keep this book as a resource and use it after graduation.

Billings and Halstead being well known scholars of the nursing world have put together a very thoughtful and interesting book. Though it's for a class, has many great insights for every day life in the nursing world. Recommend.

I am in a Masters in Nursing Education program now and we use this book in my course of studies. I will keep it for my own personal reference book once I begin teaching. It is really helpful and easy to use. I like the book and will add it to my library.

This is a great book that was required for my graduate program. The Kindle version is not a good version because the page has to be zoomed into in order to be read. You would be better served getting it on VitalSource bookshelf. The book is great and has excellent information!

Really great book (as far as textbooks go) with regard mostly to nursing academia but also applicable to clinical education. Good resource for curriculum development and up to date with alternative teaching and learning strategies.

As a MSN Nurse Educator student I found this book to be invaluable, it's like the bible for novice educators. This book has so much useful information!! I have used it in multiple classes and can't say enough good things about it.

I used this for my masters of nursing education program and rented it- bad choice. I used it for the next 4 semesters. Great book for nursing educators!! Wish I would have bought it to begin with. Spent way more money renting and extending the rental.
