Grade Level: 4 and up

Customer Reviews

It covers the basics, compass rose, intermediate directions, scale, title, longitude and latitude, hemispheres, symbols etc... Overall good book for kids who don't know anything about maps and how to read them. I teach special ed and you can't just photocopy and throw down on the kids desk. You have to teach and explain each concept in further detail. But the kids definitely come away with a better understanding on how to read maps when your done with the book. I would use this for 5th grade special ed and up.

It is a good book I will use it to reinforce skills that I feel my low readers will need.

Great learning tool!

Excellent.
