incorrect information. Needs to be updated and clearer answers and information. Enough with the "it could be" "it might be", lets list what it really can be and realistic. If the only thing you hear when trying to start your car is the "Starter clicking" your starter is bad, bad connection, weak or dead battery. It is not "you may have flooded the engine"!! The engine will still crank

I've been driving for many years. However, I have never driven in the US. I got this book in order to get an idea of the rules as I'll be moving to the US shortly. I received this book earlier than expected

from the courier - within 2 days of ordering. The information within this book is sound. However, the first day that I opened it the binding started falling apart. I do not handle books roughly. I still have books that I have used over 15 years ago and they're still in tact. I was shocked to see the binding basically fall apart on simple flipping of the pages. I do not think that there was anything I could have done to avoid this apart from not opening the book. A very big disappointment. This might end up being a waste of money as it will soon be a stack of cards...

It's just what I needed to teach driver ed. to my daughter who's home schooled. It covers every area of driving. I think it's a great tool.

Thank You fast and great price..
