# STEM, Grade 1 (Applying The Standards)

## Synopsis

Applying the Standards: STEM for grade 1 offers 64 pages of highly engaging STEM tasks. It includes a problem-solving rubric and guided pages that walk students through completing each step of the STEM process. First graders will complete tasks in areas such as chemical reactions, building structures, domino physics, weather, and sound technology. The Applying the Standards: STEM series emphasizes creativity and innovation in science, technology, engineering, and math. This is a series of six 64-page books for students in kindergarten to grade 5. A variety of topics are covered with 30 engaging tasks, and a culminating reflection question for each task encourages students to think about and apply their newfound learning and knowledge.

## Customer Reviews

This book is a great resource. However, if you have never taught a STEM lesson, you need to know that you will have to provide background information for students to understand what to do with these activities. I feel these activities would be best used as the "end of the unit" stem project.

The book is easy to follow and my kids are always up for something fun. As a stay at home mom, my kids and I can use all the fun we can incorporate in between chores. The product was new and with prime it took only 2 days
